- (1) Windows 8 support added starting with Creo Elements/Direct 18.1 release M030 and later. Further information can be found on the eSupport Portal.
- (2) Windows 7 Service Pack 1 (SP1)
Determine if your PC can run Windows 7, [click here](#).
- (3) Windows Vista Service Pack 1 (SP1)
Determine if your Windows XP-based PC can run Windows Vista, [click here](#).
- (4) Windows XP Service Pack 3 (SP3)

Creo Elements/Direct products are tested on the latest operating system service pack available at the time of release. Because system requirements define a minimum operating system service pack, a newer Microsoft service pack should not affect Creo Elements/Direct products.

However, we cannot guarantee the correct functioning of Creo Elements/Direct products on newer operating system service packs. If Creo Elements/Direct products are incompatible with the newest service pack, we will attempt to remove the incompatibilities in the next service pack or major release of its products.
